Bogota, Colombia | Full-Time (GMT-5) | English (B2) + Spanish (Native)

---

## Summary

Backend Engineer with 4+ years building scalable APIs and IAM systems in **Python** and **Go**. Experienced in **microservices**, **automation**, and **compliance (SOX/PCI)**. Passionate about **secure architecture**, **clean code**, and **reliable distributed systems**. Strong communicator in remote environments and proactive in improving developer productivity.

## Experience

### Mid Backend Engineer — Workstate · Compass

Apr 2026 – Present | Bogota, Colombia (Remote)

- Building high-performance Go backend services for Compass, one of the leading real estate platforms in the US.
- Developing and maintaining scalable REST APIs supporting production operations at large scale.
- Collaborating with distributed international teams delivering reliable, high-availability infrastructure.

### Senior Backend Developer — NEORIS · The Home Depot US

Dec 2025 – Mar 2026 | Bogota, Colombia (Remote)

- Developing **gRPC** microservices in **Go** for The Home Depot's U.S. retail ecosystem.
- Designing scalable, **cloud-native APIs** using **GCP** tools (Pub/Sub, Workflows, Cloud Storage).
- **Automating deployments** and infrastructure with GitHub Actions, Spinnaker, and **Terraform**.
- Implementing secure configurations with **Vault** and optimizing caching via **Redis** (Cloud Memory Store).
- **Monitoring** performance and reliability with **Grafana** while collaborating in **English** with **global teams**.

## Backend Developer Consultant — Personally AI

Oct 2025 – Nov 2025 | Bogota, Colombia (Remote)

- Developed backend and AI-powered WhatsApp chat systems using **Python** and **FastAPI**.
- Integrated APIs linking **custom-trained AI assistants** with client-specific knowledge bases.
- Led backend and security architecture for a **presidential campaign**, ensuring privacy and reputational protection.
- Collaborated with ML teams on retrieval pipelines and embedding optimization.
- Delivered infrastructure serving **1,000+ active users** with high reliability and uptime.

## Cybersecurity Developer — IAM · Mercado Libre

Jun 2021 – Sep 2025 | Bogota, Colombia (Hybrid)

- Built and scaled **Python** and **Go** microservices supporting 40K+ internal and 100K+ external users.
- Designed APIs processing **1M+ daily requests** for IAM lifecycle and permissions.
- Created an **automated access revalidation engine**, ensuring continuous **SOX/PCI compliance**.
- Optimized API queries, reducing response times by **35%** and improving integration stability.
- Implemented **regional data segmentation** to meet LATAM compliance requirements.
- Collaborated across **security, DevOps, and data** teams in an Agile environment.

## Projects

- **tax-time** — [github.com/gabotachak/tax-time](https://github.com/gabotachak/tax-time) Colombian AI tax advisor. 100% local, no internet, no subscriptions. Python + Ollama.
- **pokemon-agent** — [github.com/gabotachak/pokemon-agent](https://github.com/gabotachak/pokemon-agent) Multi-LLM AI agent framework using Claude + Gemini.
- **logi-hyprland** — [github.com/gabotachak/logi-hyprland](https://github.com/gabotachak/logi-hyprland) Pure evdev gesture daemon for Logitech M720 on Hyprland. Zero external dependencies.
- **ambrosia-hades-api** — [github.com/gabotachak/ambrosia-hades-api](https://github.com/gabotachak/ambrosia-hades-api) Role and permissions management API in Python + FastAPI with asymmetric JWT authentication.

## Education

- **B.Sc. Systems and Computing Engineering** — *National University of Colombia* (2018–Present)
  - **Former Teaching Assistant** – Numerical Methods (Python)

## Key Achievements

- Automated IAM revalidation engine — ensured continuous compliance.
- Improved API performance by **35%** and uptime to **99.9%**.
- Delivered secure AI backend for a **national-level campaign**.

## Skills

- **Languages:** Go (Advanced), Python (Advanced), SQL, TypeScript, Bash
- **Frameworks:** FastAPI, Flask, NumPy
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis (Cloud Memory Store)
- **DevOps:** Docker, Git, Linux, CI/CD, Postman, GitHub Actions, Terraform, Spinnaker, Vault, Grafana
- **Cloud:** GCP (Pub/Sub, Workflows, Cloud Storage), Google Cloud Storage
- **Protocols:** gRPC, REST APIs
- **AI / Automation:** OpenAI API, RAG pipelines, Chatbots
- **Security:** OAuth2, JWT, RBAC, SOX, PCI
